haggl × pulsartech

Your customers now shop with AI.

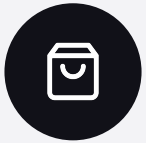

Haggl helps your business win the sale.

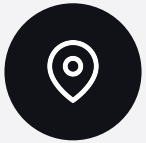

A partnership for Georgian businesses

People already ask AI for everything.

Every day. And more tomorrow.

What should I buy?

Where to stay?

Which bank is better?

Where is the best price?

+393% growth in shoppers coming to stores from AI in one year

Adobe, US retail, Q1 2026 vs Q1 2025

Shopping is changing.

BEFORE

The customer does the work.

- Opens 10 websites
- Compares prices
- Calls and waits

NOW

AI does the work.

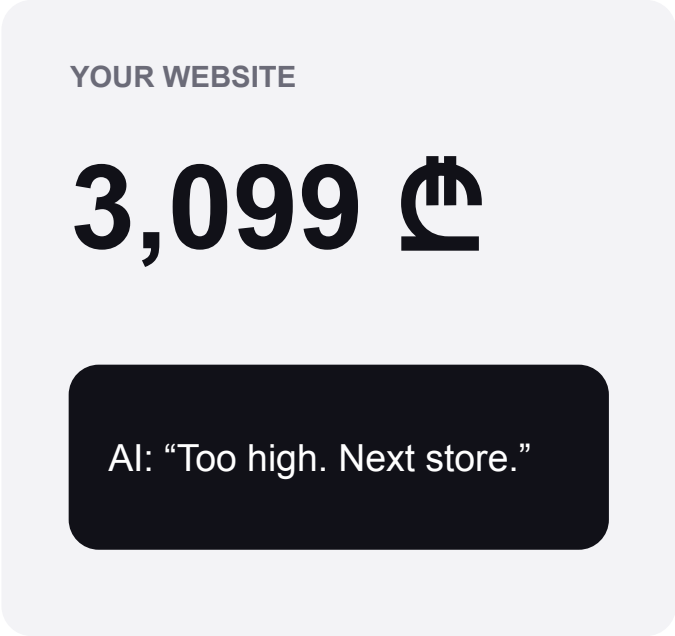

“Find me the best laptop under 3,000 ₾.”

“Done. Here are 3 options.”

But your website can’t talk back.

AI looks at your price.
If it’s not the best, AI moves on to the next store.

No questions. No offer. No sale.

MEET HAGGL

Your AI salesperson.

It talks to the customer's AI
and makes an offer that wins the sale.

Customer's AI:
"Can you do better?"

Haggl:
"Yes — here's a deal."

"Buying now."

THE KEY DIFFERENCE

Not a chatbot. A negotiator.

Example: a real estate developer's website

OTHER AI CHATBOTS

"The price is $2,000 per m²." That's it.

RULES SET BY THE DEVELOPER

- Lowest: $1,850 / m²
- Cash: up to 6% off
- Sign fast: add a bonus
- Bonus: free parking

Buyer's AI
2-bedroom flat. My client pays cash. Best price?

Haggl
For cash, I can offer $1,900 per m².

Buyer's AI
Can you go lower? We can sign this week.

Haggl
Sign this week: $1,880 per m² + free parking.

Deal closed.
Inside the developer's rules.

How it works

1

Customer asks AI

“Find me a good deal.”

2

AI talks to Haggl

Haggl asks what the customer needs.

3

Haggl makes an offer

The customer buys from you.

What it looks like

A real-time talk between two AIs. It takes seconds.

- Customer’s AI
- Haggl (your business)

Example

My user wants this laptop. Any better price?

Sure. Is it for work or study?

Study. First time buying here.

Student offer: 2,849 ₾ + free delivery. Valid today.

Deal. Buying now.

Upsells and extras

+5.6 points

Recommendation rate rose from 25.9% to 31.5%.

+22.5%

Recommended value per shopper rose from $25.19 to $30.85.

Buy two, get one free

A bigger basket can unlock a free third item.

Gift or free shipping

Haggl can add value without lowering the price.

Offers based on customer value

The customer’s AI proves why the shopper qualifies.

You define value

Lifetime value, loyalty, spend, or payment terms.

The agent proves it

The customer’s AI shows that they qualify.

Haggl rewards it

Discount, special price, VIP treatment, or extras.

What your business gets

More sales

Up to 50× more AI shoppers buy with Haggl.[1]

Smart offers

The right offer for each customer — no discounts for everyone.

Works 24/7

Answers instantly, day and night.

Pay for results

A fee only when a deal is made.
